About Me

Based in Ceará, Brazil. Professional transitioning to a programming career with 8 months of experience. Completed the Programmer Profession (Fullstack) course in December 2023 and the Dev Samurai Front-End course Feb. 2024 to the present. Completed more than 18 projects, using technologies such as HTML, CSS, JavaScript, Python, React, React Native, Sass, Bootstrap, Tailwind, Next.js, PostgreSQL, MariaDB, and Express. Since working at Deloitte, I have worked with data analysis, including Power B.I.

Professional Experience

Web Developer
Freelancer
August/2023 - Present

- Started studying programming during college, developing personal websites. In August 2023, I started specializing, working on my first projects as a Freelancer, completing more than 18 projects since then. Some professional and others for study and to improve my skills.
- Projects using HTML, CSS, JavaScript, React, Bootstrap, Next.js, among others.

Accountant
Self-employed
2019 - Present

- Providing consulting and auditing services, as well as accounting for companies.

Internal Auditor Latam
BNP Paribas
2017 - 2019

- Responsible for internal audits in Latin America.
- Participation in global audits and meetings with international teams.
- Conducted audits in Latin American countries such as Peru, Colombia, and Chile.
- Conducted meetings in English, Spanish, and Portuguese.

External Auditor
Deloitte
2014 to 2017

- Worked on global audits, including collaboration with teams in the USA. (main Clients: DowChemical, CSN, ViaVarejo, etc).

- Participated in the Deloitte Audit Inovation team to implement technologies in auditing. Ex: Tableau for audit and data analysis. SAP ECC.

- Facilitator of training on tools, frameworks, and accounting and auditing rules.

Featured Projects

The Fit Club

Project with a lot of animation using React. It was interesting because I was able to learn how to create animations and color scales.

See the site. <https://fit-club-website-lyart.vercel.app/>

Cara Store

Ecommerce project using HTML, CSS, and JavaScript. It was interesting because I was able to learn more about the Mobile First concept and create a beautiful ecommerce store.

See the site. <https://cara-store-six.vercel.app/>

Star Wars Characters

The first project I did using JavaScript consuming an API. It was interesting to observe the power of the language and use libraries.

See the site. <https://star-wars-characters-iota.vercel.app/>

Power BI Dashboards

Check out some types of Dashboards I've already created with Power B.I. non-confidential information.
